

Allergic Diseases: HDM-Induced Asthma

Allergies against house dust mites (HDM), a common aeroallergen, are observed in up to 85% of asthmatic patients worldwide. HDM is an immunologically complex antigen which activates both innate and adaptive immune responses (1). Moreover, it was reported that proteinases in HDM, such as trypsin-like enzymes, promoted allergenicity to proteins and can initiate allergic reactions (2). To facilitate allergic asthma research, Chondrex, Inc. provides HDM extracts as clinically relevant allergens to induce mouse asthma models that mimic how asthmatic patients are sensitized with aeroallergens. In addition, Chondrex, Inc. also provide anti-HDM antibody ELISA kits to evaluate these mouse models. For more information about these products, please contact support@chondrex.com.

General Protocols for Inducing Asthma in BALB/c Mice

1. Acute Asthma Model

2. Chronic Asthma Model

A Chronic Asthma Model

Six BALB/c mice received 150 µg HDM mixed with 0.2 mg Aluminum Adjuvant by weekly IP injections. Serum total IgE levels at weeks 4 and 7 were significantly higher than those at week 0 (blue). In addition, anti-HDM IgE levels were significantly higher at week 7 (orange) than they were at week 0 and 4.

Der p1 Associated Trypsin Activity in HDM

Trypsin activity in HDM from two vendors were compared. Vendor A's HDM showed high trypsin activity with cysteine activation, indicating that it contains high levels of cysteine proteinases, such as Der p1. On the other hand, cysteine treatment did not activate Vendor B's HDM, possibly due to interfering trypsin activity from other serine proteinases, such as Der p3.

House Dust Mite Related Reagents*

Products	Quantity	Catalog #
House Dust Mite Extract from <i>D. pteronyssinus</i>	0.6 mg, lyophilized	3033
House Dust Mite Extract from <i>D. farinae</i>	0.6 mg, lyophilized	3040
Extract from <i>Acarus siro</i>	0.6 mg, lyophilized	3102
House Dust Mite Extract from <i>D. pteronyssinus</i> - Biotinylated	0.1 mg, lyophilized	3045
House Dust Mite Extract from <i>D. farinae</i> - Biotinylated	0.1 mg, lyophilized	3044
Extract from <i>Acarus siro</i> - Biotinylated	0.1 mg, lyophilized	3103
Lipopolysaccharide (LPS) from <i>E. coli</i> O111:B4	0.5 mg/ml x 5 ml	9028

*Individual monoclonal antibodies against HDM are also available. Please visit www.chondrex.com for more information.
